

Dear Colleague,

We are delighted to announce the launch of the **Energy Transition Network** at the University of Chicago. From new materials to innovative applications, **the Network's mission** is to develop the talent pipeline of tomorrow and the technology necessary for meeting the clean energy goals and demands of the future.

The Network convenes experts at the University of Chicago, regional national laboratories, and industry in a pre-competitive, collaborative environment to advance energy solutions. We will bridge across sectors to transform the scientific fields critical to creating **sustainable advanced energy solutions to enable the grid of the future** through open discussion, collaborative research, and yearly summits.

Please join us in Chicago for this invite-only event to learn more about the Network, energy science and research at UChicago, and to begin the conversation about how we can tackle the challenges facing the energy supply chain together.

Date: Friday, August 16, 2024

Time: 8 a.m. - 5:30 p.m.

Where: David Rubenstein Forum, 1201 E. 60th Street, Chicago IL 60637

Stay tuned for more details coming soon.

Sincerely Yours,

Founding faculty co-directors

Y. Shirley Meng

Professor, Molecular Engineering
Chief Scientist, ACCESS, Argonne National Lab.

Laura Gagliardi

Richard and Kathy Leventhal Professor,
Chemistry and Molecular Engineering
