

# THE UNIVERSITY OF CHICAGO

# CORPORATE ENGAGEMENT

## Solutions Start Here

### Our Mission

The Corporate Engagement Office is a **collaborative** and **proactive** organization that is the doorway to the University of Chicago for industry partners. By streamlining and coordinating engagement efforts, we support and advance strategic company partnerships.

### Our Activities

#### Opportunity Development

We work with faculty and leadership to identify opportunities for broad engagement and develop them into strategic, long term partnerships, networks and initiatives.

#### Transaction Design

We work with researchers and administrative units across campus to design the relationship that fits our mutual objectives, and coordinate efforts to ensure effective and efficient implementation.

#### Seamless Network Connectivity

We provide a central hub to identify, connect, and enable seamless interactions between our industry and academic partners.

#### Partnership Management

We manage multifaceted corporate partnerships and coordinate efforts across campus to maximize company engagement.

### UChicago at a Glance

<b>99</b> Nobel laureates affiliated with UChicago	<b>7,011</b> Undergraduate Students	<b>10,459</b> Graduate Students	<b>193,885</b> Worldwide Alumni
---	---	------------------------------------	------------------------------------

### Partnerships: Building Strong Bonds

#### UChicago, UTokyo, IBM, and Google Partner to Advance Quantum Computing

In partnership with the University of Tokyo, the University of Chicago received \$100 million from IBM to help develop a quantum-centric supercomputer. Additionally, the two universities were awarded \$50 million from Google to support quantum research and workforce development.

#### Chan Zuckerberg Biohub in Chicago

In partnership with UChicago, Northwestern University and the University of Illinois at Urbana-Champaign, the CZ Biohub elevates Chicago's profile as a leader in biotechnology and will lead to advancements in biological engineering that would not be possible without the network of partners and expertise.

#### UChicago & Portal Innovations Announce New Science Incubator

The UChicago Science Incubator will encompass approximately 22,000 square feet at Hyde Park Labs, with an anticipated opening in Q2 2025. The joint effort will help translate early-stage concepts into commercial opportunities in the areas of life sciences, quantum, AI, and climate and energy tech.
